

## **DOE-Wide P2 Goals – Advantages**

- Sets a standard for P2 achievement both DOE-wide and at individual sites
- Measurable
- Easy to Track
- Level playing field
- Readily shows compliance with EOs
- DOE-Wide goals imposed over several years

## **DOE-Wide P2 Goals – Disadvantages**

- Every site is different
- Is not activity-based
- Data can be misleading
- Baseline year may be atypical
- DOE-wide goals imposed at the site level

## **Site-Specific Goals – Advantages**

- Goals can be tailored to the site
- Site control in determining achievable goals
- Annual adjustment of goals possible
- Clear understanding between contractor and local DOE
- More practical for contract commitments
- Easier to make activity-based

## **Site-Specific Goals – Disadvantages**

- May not be equitable by site
- No standard to define excellence
- More difficult for DOE to show progress

## **Environmental Management System Option**

- EMS required at all applicable facilities by 12-05
- EMS required to have P2 goals (DOE 450.1)
